Recursion

## Aim:

Write a program to search the given element from a list of elements with linear search technique using **recursion**.

Note: Write the functions read1() and linearSearch() in Program911a.c

## **Source Code:**

## Program911.c

```
#include <stdio.h>
#include "Program911a.c"

void main() {
    int a[20], n, pos, key;
    printf("Enter n value : ");
    scanf("%d", &n);
    read1(a, n);
    printf("Enter a key element : ");
    scanf("%d", &key);
    pos = linearSearch(a, 0, n - 1, key);
    if (pos == -1) {
        printf("The key element %d is not found\n", key);
    } else {
        printf("The key element %d is found at position : %d\n", key, pos);
    }
}
```

## Program911a.c

Test Case - 1
User Output
Enter n value : 4
Enter 4 elements : 10 20 15 12
Enter a key element : 15
The key element 15 is found at position : 2

Test Case - 2	
User Output	
Enter n value : 6	
Enter 6 elements : 2 6 4 1 3 7	
Enter a key element : 5	
The key element 5 is not found
